About Us

MultiRoofing Systems Ltd was established in 1992 to meet the needs of a growing construction industry in Ireland. Through organic sustainable growth, MultiRoofing Systems now finds itself a market leader as a building envelope specialist contractor.

With offices in Dublin, Cork, Poznan and London, we are well positioned to offer our clients the quality building solutions they have become accustomed to.

Our clients range from government departments, to retail giants and from leading main contractors to international pharmaceutical companies and everything in between. We pride ourselves on offering all clients the best possible solutions, tailored to fit their specific requirements.

We are approved installers for the industry's leading manufacturers of roofing, cladding and structural waterproofing products. It is the strong relationship we share with our suppliers that enables MultiRoofing Systems to consistently move with the times and adapt to the technical advancements made within the industry.

Our reputation within the construction industry for meeting our clients expectations is well known, it has always been our mantra that you can only be judged on recent performance, rather than rest on previous achievements. We have only been able to live up to this statement by consistently introducing new technologies and building advancements into our business practices, allowing us to improve quality and reduce costs.

Our Services

- Roofing
- Cladding
- Glazing
- In-House Fabrication
- Asbestos Sheet Removal

Environmental Policies

1. Manage activities in ways that reduce environmental impact to a practical minimum.
2. Seek continual improvement of environmental performance including a reduction of pollution and waste. To this end risk assessments for the environmental impacts of all activities will be prepared and measures to mitigate those impacts implemented as far as is reasonably practical.
3. Comply with all applicable environmental legislation, regulations, international protocols and industrial codes of practice and endeavour to attain standards higher than those laid down therein as minimum requirements. Where applicable, we will liaise with central and local Government bodies to ensure that their requirements are actioned.
4. Promote general environmental awareness among employees..
5. A copy of this Environmental Policy statement is displayed in Company premises and is freely available on demand to any legitimately interested party or member of the public.

In order to implement this Environmental Policy MultiRoofing will:

- Ensure that this policy is understood, implemented and maintained at all levels.
- Provide public access upon request from legitimately interested parties to information on environmental performance.
- When involved in design, do so in ways that blend as sympathetically as possible with the prevailing or projected surroundings.
- Conserve and protect the environment by operating in a socially responsible manner.
- Operate and maintain all plant and equipment to the highest standards practical.
- Encourage a 'cradle to grave' philosophy towards all material, components and packaging, be receptive to relevant modifications in product design and working practices including the prevention of pollution.
- Recycle surplus materials and waste from its sites, offices and works whenever practical. On those occasions when reuse or recycling is not practical, disposal of surplus materials and waste will be in accordance with the best environmental practice.
- Minimise waste by better utilisation of raw materials, energy and water, increased use of reusable, recyclable and renewable materials and the development of strategies for minimising waste.
- Promote and encourage environmental excellence throughout the Company and its network of suppliers and subcontractors.
- Adopt the least environmentally damaging transport strategy for own vehicles and to encourage its suppliers and subcontractors to do likewise.
- Deal only with reputable registered waste carriers that have been vetted by the external independent auditor and whose vehicles, operations and premises are subject to regular inspection and auditing. Provide advice to customers and end users on the correct use, maintenance and eventual disposal of all installations carried out under the direction of the company.
